-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to because the figures are too small to reasonably see the details being described in the specification and the lines are not sharp and clear. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Figures 1a-1d and 2a-2c should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled

Art Unit: 3765

"Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: ***

Page 1, line 6: Insert --10/762,115-- after "Application No."

Page 1, line 9: Insert --10/762,021-- after "Application No."

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 3, 5, 8, 10, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Baskin (U.S. 1,378,758).

Baskin discloses a four fingered glove comprising an integrated sheet including a front index finger portion 3, a rear index finger portion 6, a rear middle finger portion 4a, a rear shell portion 5a, a finger end and a thumbhole 21. A finger piece having a front middle finger portion 4 and a front shell portion 5 is provided

Art Unit: 3765

and coupled to the finger end and the front index finger portion such that the front and rear middle finger portions are together configured to receive a middle finger and such that the front and rear shell portions are together configured to receive a third finger and a little finger and a thumb piece coupled to the thumbhole of the integrated sheet and configured to receive a thumb. The glove is capable of being used while welding.

With regard to claim 3, a first stitch line is formed between the rear index finger portion and the rear middle finger portion and a second stitch line is formed between the rear middle finger portion and the rear shell portion. One of the first and second stitch lines is shorter than the other one.

With regard to claims 5, 8 and 10, the invention is disclosed above.

With regard to claim 12, the front index finger portion 3 is adjacent to the rear index finger portion 6.

With regard to claim 13, the front shell portion 5 is adjacent to the rear shell portion 5a.

Allowable Subject Matter

6. Claims 2, 4, 6, 7, 9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3765

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baskin '560, Scott '676 and Spector '439 disclose various gloves having four fingers.
